Recommended Vaccination for Mars Hill University

Vaccine	Number Doses Required Before School Entry*
COVID-19	Dependent upon which vaccine is chosen.

*Please read below for further information

Diphtheria, tetanus and pertussis: Three doses are required for individuals entering college or university. Individuals entering college or university for the first time on or after July 1, 2008 must have had three doses of tetanus/diphtheria toxoid; one of which must be tetanus/diphtheria/pertussis.

Polio: Three doses are required for individuals entering college or university. An individual attending school who has attained his or her 18th birthday is not required to receive polio vaccine.

Measles: Two doses at least 28 days apart are required for individuals entering college or university. The requirement for a second dose does not apply to individuals who entered school, college or university for the first time before July 1, 1994. A person who has been diagnosed prior to January 1, 1994 by a physician (or designee such as a nurse practitioner or physician's assistant) as having measles (rubeola) or an individual who has been documented by serological testing to have a protective antibody titer against measles is not required to receive measles vaccine. Individuals born before 1957 are not required to receive measles vaccine except in measles outbreak situations.

Mumps: Two doses are required for individuals entering college or university. A physician's diagnosis is not acceptable for mumps disease(s). Individuals must be immunized or have laboratory confirmation of disease or have been documented by serological testing to have a protective antibody against mumps. Individuals born before 1957 are not required to receive the mumps vaccine. Individuals that entered college or university before July 1, 1994 are not required to receive the vaccine. Individuals that entered school, college, or university before July 1, 2008 are not required to receive the second dose of mumps vaccine.

Rubella: One dose is required for individuals entering college or university. A physician's diagnosis is not acceptable for rubella disease(s). Individuals must be immunized or have laboratory confirmation of rubella disease or have been documented by serological testing to have a protective antibody titer against rubella. Any individual who has attained his or her fiftieth birthday is not required to receive rubella vaccine except in outbreak situations. Any individual who entered college or university after his or her thirtieth birthday and before February 1, 1989 is not required to receive rubella vaccine except in outbreak situations.

Hepatitis B: Three doses are required for individuals entering college or university. Hepatitis B vaccine is not required if an individual was born before July 1, 1994.

Varicella: One dose is required for individuals entering college or university that were born on or after April 1, 2001. An individual who has laboratory confirmation of varicella disease immunity or has been documented by serological testing to have a protective antibody titer against varicella, or who has documentation from a physician, nurse practitioner, or physician's assistant verifying history of varicella disease is not required to receive varicella vaccine. The documentation shall include the name of the individual with a history of varicella disease, the approximate date or age of infection, and a healthcare provider signature. Individuals born before April 1, 2001 are not required to receive varicella vaccine.

COVID-19:

Pfizer vaccine (2 doses) 21 days apart

Moderna vaccine (2 doses) 28 days apart

Johnson & Johnson vaccine (1 dose)
